Planning

Master

Urban Planning

## If you are a third-year high school student

- ✓ If you have an interest in understanding, analyzing, and organizing the natural and human environment,
- ✓ If you have an interest in fieldwork,
- ✓ If you want to specialize and contribute to the planning, construction, management, and organization of the territory.
- ✓ You have often encountered situations in your daily life that raised questions and you have sought answers related to how: you move, the place of your studies, the organization and distribution of various services and departments in the neighborhood, gathering, or city you live in.....

## Why should you choose the Geography and land Planning field?

- ✓ Intensive and continuous training throughout the academic path, accompanied by constant support.
- ✓ A well-balanced training that combines theoretical perspectives, sciences, analytical tools, and targeted competencies with practical application through various field internships provided by the department, specialized workshops, and educational outings.
- ✓ An open-minded field that engages with social and economic realities on an ongoing basis.
- ✓ Opportunities to obtain multiple professional internships in various public and economic institutions that intersect with the interests and orientations of the field.

## The career paths and job Opportunities

- ✓ Teaching at the middle school or high school level.
- ✓ Employment in the Ministry of National Defense, such as the National Institute of Maps and Remote Sensing.
- ✓ Employment in various public and private consulting firms.
- ✓ Establishing your own consulting firm that operates in various fields related to urbanism, development, planning.
- ✓ Employment in various departments and institutions whose tasks intersect with the field.
- ✓ Geomatics professions
- ✓ Tourism professions

You can achieve all of that through your choice of :  
**Geography and land Planning.**  
**Géographie et Aménagement du Territoire GAT**  
**Field of study: Earth and Universe Sciences (STU)**

**Code E01LAL01**
